Established by the Public Works Historical Society, the Michael Robinson Award recognizes the single best article published in the field of public works history. This award is intended to provide encouragement and recognition to historians and practitioners whose research and publications have made outstanding contributions to the history of public works.

Articles published in calendar year 2014, covering one or more public works topics are eligible. Public works is defined as the physical structures and facilities that are developed, owned, and operated by public agencies to house governmental functions and provide water, power, waste disposal, transportation, and similar public services. Articles must be a minimum of 500 words in length and published by a widely known journal or periodical. Articles published by APWA, its chapters, or the Society are not eligible.

The selection committee is comprised of professional historians and public works practitioners appointed by the Public Works Historical Society.

The criteria used in the selection process include:

- academic significance to the historical community,
- practical application to the public works profession,
- dissemination of information not available by other means,
- unique or innovative presentation of topic.

Individual authors, journal editors or publishers may submit an article for consideration. Nomination submittals must include six copies of the publication and any supporting documentation, along with the nomination form. Materials should be sent to APWA national headquarters in Kansas City. Materials submitted in support of nomination will not be returned.

April 15, 2015

The award is presented to the author at the Society’s annual luncheon held in conjunction with the APWA International Public Works Congress & Exposition.

2006 “Before the Big Dig: Boston’s Central Artery as a Construct of Mid-Century Modernity” by Amy D. Finstein
