

# ALL APWA KNOWLEDGE TEAMS AND SUBCOMMITTEES...

# ARE ACCEPTING MEMBERS!

## APWA SUBCOMMITTEES AND KNOWLEDGE TEAMS CAN BE A GREAT INTRODUCTION TO SERVING APWA ON A NATIONAL LEVEL

APWA knowledge teams and subcommittees offer an opportunity for those who may be interested in contributing to a Technical Committee's projects and technical discussions. Knowledge team and subcommittee members have a unique opportunity to share their expertise with the Technical Committee and have a primary role in specific project direction and specific education content. Currently, all knowledge teams and subcommittees shown below are accepting members.

### What is the difference between a subcommittee and a knowledge team?

A subcommittee is assigned to a specific discipline within an APWA Technical Committee. Subcommittees meet on a regular basis.

A knowledge team is created to consult the Technical Committee on a variety of projects; not limited to one specific aspect in the technical area. Knowledge team members have the flexibility to work on projects that most interest them and fit their schedules.

### How to join subcommittees and knowledge teams:

If you would like to join a subcommittee or knowledge team, please email [education@apwa.net](mailto:education@apwa.net).

#### Asset Management Committee

- Knowledge Team
